Storage temperature : ~ 18 (5 - 25) °C nformation on mixed storage : No specific measures are necessary.	Hygiene measures	
Direct sunlight. Keep container closed when not in use. ncompatible products Strong bases. Strong acids. ncompatible materials Sources of ignition. Direct sunlight. Maximum storage period 3 year Shelf life to guarantee the quality and properties of the product; After this period, it is recommended to control organoleptic and physicochemical properties before using the raw material. Storage temperature - 18 (5 - 25) °C Information on mixed storage No specific measures are necessary.		
ncompatible products: Strong bases. Strong acids.ncompatible materials: Sources of ignition. Direct sunlight.Maximum storage period: 3 year Shelf life to guarantee the quality and properties of the product; After this period, it is recommended to control organoleptic and physicochemical properties before using the raw material.Storage temperature: ~ 18 (5 - 25) °Cnformation on mixed storage: No specific measures are necessary.	Storage conditions	 Keep only in the original container in a cool, well ventilated place away from : Heat sources, Direct sunlight. Keep container closed when not in use.
